9. Other _____.

REASONS FOR ALLOWANCE

1. This Office Action is responsive to the Amendment filed on 8/26/04.
2. Claims 1-10, 12, 13 and 15-23 are allowed.
3. The following is an examiner's statement of reasons for allowance:

-Regarding to independent claims 1 and 6, none of prior art of record teaches or suggests a method and associated system comprising procedures/devices of multiplying an input $\Delta\Sigma$ modulation signal generated from $\Delta\Sigma$ modulation by a specified factor for specified processing; reapplying $\Delta\Sigma$ modulation to an output provided with said specified processing by using a $\Delta\Sigma$ modulator comprising a plurality of integrators for varying effective orders; and switching between said input $\Delta\Sigma$ modulation signal and said reprocessed $\Delta\Sigma$ modulation signal.

-Regarding to independent claim 12, none of prior art of record teaches or suggests a system as claimed. Kerema et al (5,248,972), previously cited, fails to teach the limitation "said integrator further includes an integrator adder that receives an output from said fraction elimination means; and an integrator delay circuit that delays an output from said integrator adder, said delayed output from said integrator adder being provided to said fraction elimination means", in combinations with other limitations recited in the claim. It would not have been obvious for one skilled in the art to implement Kerema et al in view of other prior art of record in order to make such an implementation leading to the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
